## IN ALTO UNO

*The new inAlto interprets style and fine quality in an exquisite expression of creative flair that has developed new, modern and elegant forms of designer stemware, combined with unprecedented technological progress, raising the aesthetic and quality parameters to new heights.*

*Laser cut rims are even thinner and more precise, improved distribution of molten glass means even less weight. The pulled stem is elegant and symmetrical and the new foot is thin and flat for maximum stability.*

## IN ALTO SENSI

*TRE SENSI is a synonym of excellence thanks to the flatness and stability of its special foot and its lightness, which combines with the strength of the exclusive XLT treatment to make the stems even more resistant over time. A tough and invisible shield protects the stem from the most frequent causes of breakage (washing, twisting and daily use) and prolongs its useful life even after repeated washes.*
