CORELLE

Introduced in 1970, **CORELLE** is recognised worldwide for its legendary strength and durability. The first of its kind when developed, **CORELLE** glass dinnerware's underlying technology was an achievement of Corning Glass Works R&D scientists.

TECHNOLOGY APPLIED TO THE TABLETOP

CORELLE dinnerware is the original break and chip resistant glass dinnerware.

CORELLE glass dinnerware is made through a hub lamination process that thermally bonds three layers of glass: core glass in the middle, with top and bottom layers of very clear skin or glaze glass. The process creates a lightweight, durable, multi-layered product. In addition, the unique enamels used during the decorating process actually become part of the glass, so the patterns last as long as the plate.

CORELLE dinnerware offers these unique features and benefits:

- Chip and break resistant
- Lightweight and stackable, yet durable
- Easy to clean and dishwasher safe
- Oven and microwave safe
- Spot and fade-resistant under normal use
- Affordable and attractive
- 3-year replacement warranty
